OBJECTIVE

Computer Science Engineering graduate with strong foundations in Data Structures Algorithms, Object-Oriented Programming, DBMS, and Software Engineering. Experienced in developing full-stack web applications and building scalable software solutions using modern technologies. Passionate about problem-solving, coding, and continuous learning. Seeking a Graduate Engineer – Software Engineering role to contribute to innovative projects and grow as a software professional.

TECHNICAL SKILLS

Languages:	Java, JavaScript (ES6+)
Frontend:	React.js, HTML5, CSS3
Backend:	Node.js, Express.js, RESTful APIs
Database:	MongoDB, MySQL
Tools & Platforms:	Git, GitHub, VS Code, Postman, npm
CS Fundamentals:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

PROJECTS

EduStream — Learning Management System *Node.js | Express.js | MongoDB | JWT | Razorpay*

- Built a **full-stack Learning Management System (LMS)** enabling instructors to create and manage **video courses** while students enroll, stream lessons, and track **learning progress**.
- Developed secure **JWT-based authentication** with **bcrypt** password hashing and **role-based authorization (RBAC)** for instructors and students.
- Integrated **Razorpay** payments with **server-side HMAC-SHA256 signature verification** to securely validate transactions before granting course access.
- Designed **MongoDB schemas** using **references** and **embedded documents** for optimized course, lesson, enrollment, and progress management.
- Deployed the application using **Vercel** (frontend), **Render** (backend), and **MongoDB Atlas** with a responsive **React + Tailwind CSS** UI.

Real-Time Chat Application *React.js | Express.js | Node.js | Socket.IO*

- Architected real-time bidirectional communication using **Socket.IO** WebSockets, achieving a **40% reduction in message delivery latency** alongside live typing indicators and user presence tracking.
- Optimized frontend bundle using lazy-loaded React components and code splitting, improving **mobile First Contentful Paint (FCP)** by **35%** and significantly enhancing user experience on low-bandwidth connections..
- Implemented **JWT (JSON Web Tokens)** authentication flow with secure session handling and token expiry, reducing login validation time by **25%** and preventing unauthorized API access.
- Designed a RESTful backend with Express.js and a MongoDB schema using Mongoose ODM, supporting persistent message history, user profiles, and chat room management.

EDUCATION

Bachelor of Engineering — Computer Science	JSPM's BSIOTR, Pune	2022 – 2026
CGPA: 7.55 / 10.0		
HSC (Class 12)	Maharashtra State Board	2022
Percentage: 86.00%		
SSC (Class 10)	Maharashtra State Board	2020
Percentage: 91.80%		

ACHIEVEMENTS & ACTIVITIES

- Solved **100+ Data Structures & Algorithms (DSA)** problems on competitive programming.
- Maintained a strong academic record with a consistent **CGPA of 7.55/10.0** across all semesters of the Bachelor's program.
- Applied Object-Oriented Programming (OOP), DBMS, and Software Engineering principles in academic and personal projects.
- Actively participated in technical workshops, hackathons, and coding competitions, enhancing teamwork and practical development skills.
